Committed to Creating *a positive change*

The Cindy Donald Dreams of Recovery Foundation, Inc. is a 501C3 Non-profit organization dedicated to helping individuals with Spinal Cord Injuries (SCI) and/or Acquired Brain Injuries (ABI) receive financial support for therapy, equipment, and research they so desperately need.

A Spinal Cord Injury is not only a very emotional catastrophic injury for the individual and their family - it is also a very expensive injury. One that most insurance plans do not fully cover.

Equipment, such as the FES (Functional Electrical Stimulation) Bike, cost \$15,000 per unit. Therapeutic expenses following an injury can exceed \$5,000 per month that insurance does not cover. For most individuals, it takes an intense three months of therapy to learn a skill that will benefit them for a lifetime. For example, a paralyzed individual may learn valuable skills such as feeding themselves or transferring themselves from their beds to a wheelchair. Dreams of Recovery is dedicated to making a lasting difference in our Grant Recipient's lifetime by offering \$15,000 grants to each recipient.

Today we have over 44 individuals on our waiting list, and sadly it continues to grow. Dreams of Recovery is a nationwide charity and our website has received visits from all States in the US and interest for assistance from most. We have also received interest from 82 foreign countries and we continue to grow and need your support to help others. 100% of proceeds go directly to assisting individuals suffering from SCI and ABI. The foundation is operated by a team of highly motivated and dedicated volunteers that have supported our efforts since inception.

At Dreams of Recovery, we know there are many individuals and companies that share the common goal of providing hope for improvement and overcoming obstacles that sometimes seem impossible. Dreams of Recovery wants to make the impossible possible.

Please join us in making an impact on individuals and keeping their dreams of recovery alive.

Sponsorship Levels
